WORK HISTORY

2019 - present	**Software Engineer** KuveytTurk Participation Bank *Debit / Credit Card System – Card Transformation* *Project – C#, MsSql, Asp.Net Framework*
2016 (summer)	**Internship** SVS Telecom. and Satellite Systems Inc. *Java GUI Development and Software Testing*
2019 (summer)	**Internship** Visiobit Information Technologies *HTML Component Creator and Communicating* *via C# Using Nancy Framework on the backend*

EDUCATION

2019	**Gebze Technical University** Computer Engineering

AWARDS

2017	**InnoveraLabs — Java Programming Competition** 2nd prize – Fight 4j v2
2011	**TUBITAK Project Competition Among Regions of Turkey** 2nd prize in Mediterranean Region - Chemistry

LANGUAGES

- **Turkish**
  Mother Tongue

- **English**
  Conversational
  YDS - 2019: 81,25

PROGRAMMING SKILLS

- **Fluent:**   C#, Java, MsSql
- **Intermediate:**   C++98 / C++11, Python
- **Basic:**   MySQL

PROJECTS

- **Backgammon Game (Collaborative)** → **Buraya batuta**

  It is a game known as Backgammon played with two persons. The game was developed as a group project. Throwing and checking dice part were developed and some step issues were fixed by me. — git.io/fpr9J

- **Raspberry PI-based Internet Radio (Individual)**

  It is my one of mandatory undergraduate projects in which radio stations   being able to stream over IP/URL can be listened. — git.io/fpr9e

- **Home Price Prediction by Machine Learning (Individual)**

  It is my second-individual-project in which I carry out linear-regression algorithm with a tool called as Orange. The data to be trained is obtained with my hands(!) with some techniques i.e. web-scrapping.

- **ESP32-based Smart Wristband (Collaborative)**

  The group project in which I was the part of ESP32's communication, connection with other components like sensors, and JSON string transmission was productized in May,2019. — bit.ly/smartwrist

- **RFAA Device Control Software (Individual)**

  I developed the GUI during my internship. It controls antenna in ways up and down etc. Besides that, it can connect the devices with TCP protocol. (IP:Port). — git.io/fpr9I

- Other projects and coursework are available on my Github.
